JUPITER QUALITY POLICY & OBJECTIVE

JUPITER is a leading Engineering, Procurement and Construction (EPC) services provider for industrial and commercial projects, in KSA and GCC areas,

JUPITER aims to meet and exceed the interested parties' needs and expectations and increase their satisfaction, by implementing international engineering and Construction standards, statutory and ISO 9001:2015 requirements,

JUPITER Management is committed to provide all necessary resources (Human, material, financial and plant machinery vehicles) to support the implementation of the quality objectives.

JUPITER Management capitalizes on the competencies of its human capital and is determined to provide the necessary support to enhance their performance and efficiency, as the most important asset of the Organization.

Every process owner in **Jupiter** must enhance the efficiency of the process under his responsibility and strive improvement opportunities that eradicate non-conformances upfront rather than learning from the teaching of their occurrence.

JUPITER authorizes its personnel to **"STOP ANY WORK ACTIVITY"** that is not in compliance with the Quality Management system requirements of that activity.
